December 2009 @ Tohono Chul Park

WHAT: EARTH FORMS

Stephen Strom is an astronomer. Stephen Strom is a photographer. In this presentation, Stephen Strom brings the sensibilities of an astronomer who has lived in the desert for almost two decades to photographs which capture a land shaped both by the millennial forces of prehistory and by yesterday's cloudburst. His images have the power to compress vast desert spaces in an illusion of intimacy and comprehension, presenting undulations of color and form which appear reimagined in a light that at once penetrates and sculpts. With essays by Gregory McNamee and Albert Stewart, Earth Forms brings together more than 20 years of powerful and memorable images of the desert landscape of the Southwest. Copies of Earth Forms will be available for sale and signing.
